WEEK 1: THE INVISIBILITY CRISIS

Theme: Your Business Is Invisible to AI — And You Don't Even Know It

MONDAY 10 AUGUST 2026

POST 1 — LinkedIn | 7:30 AM | AWARENESS

Yesterday I asked ChatGPT: "Who are the best accountants for SMEs in Sandton?"

It gave me 3 names.

None of the big firms. None of the ones spending R40,000 a month on Google Ads.

Two of them don't even rank on Page 1.

But they all have one thing in common: FAQ schema. AI-readable service pages. Clear entity signals.

The firm burning cash on Meta ads? ChatGPT has never heard of them.

This is the GEO gap. And it's costing South African businesses millions in referrals they don't even know they're losing.

AI search doesn't care about your ad budget. It cares about whether it can understand WHO you are, WHAT you do, and WHO you serve.

I built a free tool that tells you exactly where you stand. 90 seconds. No email. Just answers.

□ happyhunterdigital.com/audit

Ask ChatGPT about your industry right now. Is your business there? Drop a YES or NO below. I read every comment.

TUESDAY 11 AUGUST 2026

POST 3 — X (Twitter) | 8:00 AM | AWARENESS

I audited 47 SA business websites last week. 42 were invisible to ChatGPT.

Here’s the pattern — and why your #1 Google ranking means nothing anymore ☐

1/ Myth: “If I rank #1 on Google, AI will find me.”

Reality: 83% of AI citations come from pages OUTSIDE the organic top 10.

Your SEO agency sold you the wrong game.

2/ The businesses winning AI referrals have 4 things: → Clear entity signals → FAQ schema → Local context → Fresh content

Most SA SMEs have zero.

3/ One client spent R600K last year on Meta ads. Got 12 leads.

We optimized their GEO. 3 months later: 47 AI-referred visitors, 8 conversions.

Zero ad spend.

4/ AI traffic converts at 15.9% vs 1.76% organic.

Because AI-referred visitors arrive PRE-QUALIFIED. They've already been recommended by a trusted source.

5/ Want to see if your business is AI-visible?

Our free audit takes 90 seconds. No email required. Just answers.

happyhunterdigital.com/audit

WEDNESDAY 12 AUGUST 2026

POST 5 — Facebook | 9:00 AM | AWARENESS

THE AI VISIBILITY GAP: Why Your R50,000/Month Ad Budget Is Funding Obsolescence

Let me be direct.

The way South African businesses approach digital marketing is fundamentally broken.

You're spending 5-12% of your revenue on ads. You're optimizing for Google rankings. You're measuring success in likes and impressions.

Meanwhile, your customers are asking ChatGPT, Gemini, and Google AI Overviews for recommendations.

And you're not there.

Here's what changed:

→ Google shows 10 results. AI shows 2-3 recommendations. The competition got 3x harder overnight. → 83% of AI citations come from pages that DON'T rank on Google Page 1. Your #1 ranking is irrelevant if AI doesn't cite you. → AI referral traffic converts at 15.9% vs 1.76% from organic search. These visitors arrive pre-qualified, pre-trusted, ready to buy.

The businesses winning in 2026 aren't spending more on ads. They're architecting their digital entities for AI comprehension.

This isn't SEO. This is GEO — Generative Engine Optimization.

We built a free tool that audits your AI visibility across ChatGPT, Gemini, and Google AI Overviews.

90 seconds. No email required. Just a clear picture of where you stand.

Because you can't fix what you can't see.

POST 6 — LinkedIn | 12:30 PM | ACTIONABLE

The 5-Minute GEO Audit Anyone Can Do

Stop waiting for your agency to "get around to it."

Here's how to test your AI visibility in the next 5 minutes:

- 1 ☐ Open ChatGPT. Ask: "What are the best [your industry] businesses in [your city]?"
- 2 ☐ Is your brand mentioned? If not, your digital entity is broken.
- 3 ☐ Check your About page. Does it clearly state WHAT you do, WHO for, and WHERE? AI doesn't read fluff. It reads data.
- 4 ☐ Go to Google's Structured Data Markup Helper. Add FAQ schema to your homepage. It's free. It takes 10 minutes. It increases AI citation probability by 28-34%.
- 5 ☐ Update your Google Business Profile with AI-friendly descriptions. Not marketing speak. Clear, factual statements.

This is 5 minutes of work that most of your competitors will never do.

Want the full 47-point audit? Our free AI Marketing Audit covers everything — schema, entity signals, content freshness, local optimization, and AI citation probability.

Link in comments.

POST 8 — X (Twitter) | 5:00 PM | ACTIONABLE

Your About page is killing your AI visibility.

Most SA businesses write novels.

AI needs data.

Here's the formula that gets you cited:

[WHAT you do] + [WHO for] + [WHERE] + [WHY credible] = AI citation

Example: ✕ "We are a passionate team dedicated to delivering excellence..." ☒

"We are a Johannesburg-based accounting firm serving SMEs with turnover of R2M-R50M. 12 years. 340 clients."

Fix yours in 5 minutes.

Full template + 46 more tactics in our free Playbook:

happyhunterdigital.com/audit

#GEO #AISearch #SouthAfrica #DigitalMarketing #SME

FRIDAY 14 AUGUST 2026

POST 9 — Instagram | 8:00 AM | PROOF

[REEL: 15 seconds. Fast cuts. Data visualization.]

[TEXT OVERLAY throughout: "Same client. Different strategy."]

CAPTION: Real numbers. Real client. Real results.

This Johannesburg-based business was spending R50,000/month on Meta ads with almost nothing to show for it.

We didn't increase their budget. We changed their strategy.

→ Added FAQ schema → Rewrote their About page for AI readability →
Updated their Google Business Profile → Created location-specific service pages
→ Added llm.txt file

Result: 47 AI-referred visitors in 90 days. 8 became clients. Zero ad spend.

AI referrals convert at 15.9% because visitors arrive pre-qualified. They've already been recommended by a trusted source.

Want to know if YOUR business is AI-visible? Link in bio for the free 90-second audit.

#MarketingStrategy #SMEsa

POST 10 — Facebook | 3:00 PM | PROOF

CLIENT WIN FRIDAY

I want to share a real result from a real South African business.

Business: Plumbing services, Johannesburg northern suburbs Problem:

Spending R15,000/month on Google Ads. Getting 4 leads/month. Invisible to ChatGPT and Gemini. What we did: → Implemented LocalBusiness schema with areaServed tags → Created FAQ page with 12 common customer questions (structured data) → Added Service schema for each plumbing service type → Rewrote service pages with clear entity signals → Added review schema to existing testimonials

Timeline: 3 weeks

Results after 60 days: → 34 AI-referred visitors (ChatGPT, Gemini, Perplexity) → 6 converted to paying clients → R0 spent on ads during this period → Google Ads budget reduced by 60%

The owner told me: "I didn't believe AI search mattered for plumbers. Now it's 30% of my new business."

This is what happens when you stop fighting for Google's Page 1 and start getting recommended by AI.

Want the same audit? Link in bio. Takes 90 seconds.

#SouthAfricanBusiness #DigitalMarketing #AI #GEO #SmallBusiness
#Entrepreneurship

SATURDAY 15 AUGUST 2026

POST 11 — LinkedIn | 7:30 AM | AWARENESS

I asked 50 South African business owners 5 questions about AI search.

The results were terrifying.

✕Q1: Do you know what GEO is? → 6% said yes

✕Q2: Is your website optimized for ChatGPT? → 2% said yes

✕Q3: Do you track AI referral traffic? → 0% said yes

✕Q4: Have you updated your website content in the last 3 months? → 12% said yes

✕Q5: Do you have FAQ schema markup? → 4% said yes

Here's what this means:

94% of your competitors don't know GEO exists. 98% haven't optimized for AI search. 100% aren't tracking AI referrals. 88% have stale content that AI ignores. 96% are missing schema that drives citations.

This isn't a disadvantage. This is the biggest competitive opportunity in South African digital marketing right now.

While your competitors are fighting for Google Page 1 (where AI citations rarely come from), you can own the AI recommendation layer.

The knowledge gap IS the opportunity.

Move now. Audit your AI visibility today. Link in comments.

WEEK 2: THE AD SPEND BLACK HOLE

Theme: You're Burning Money While AI-Ready Competitors Win for Free

MONDAY 17 AUGUST 2026

POST 15 — LinkedIn | 7:30 AM | AWARENESS

Your R20,000/month Meta ad budget is funding Mark Zuckerberg's metaverse. Meanwhile, your competitor is getting free, pre-qualified leads from ChatGPT citations.

Let me show you the math:

→ Meta ad CPC in South Africa: R8-R25 → Average conversion rate: 1.5-2% →

Cost per lead: R400-R1,250

→ AI referral traffic → Cost per lead: R0 → Conversion rate: 15.9% → These visitors arrive with implicit trust

One of my clients spent R600,000 on Meta ads last year. They got 12 leads.
We optimized their GEO. Three months later: 47 AI-referred visitors, 8 conversions. Zero ad spend.

The AI referral didn't just cost less. It converted better because the visitor arrived pre-qualified. ChatGPT had already vetted them.

You're not in an ad war. You're in a visibility war.

And most SA businesses are fighting with bows and arrows while AI-ready competitors have machine guns.

Run your free audit. See where you stand. Link in comments.

#GEO #AISearch #SouthAfrica #DigitalMarketing #SME #AdSpend #ROI

POST 16 — TikTok | 7:00 PM | AWARENESS

[VIDEO: POV format. Text overlays. Trending audio.]

HOOK (0-3s): "POV: You check your Meta ad dashboard"

[Screen recording of ad manager] "R30,000 spent this month..."

[Scrolls down] "200 likes..."

[Scrolls more] "3 website clicks..."

[Scrolls more] "0 sales..."

[Cut to ChatGPT search] "Meanwhile your competitor shows up here..."

[TEXT OVERLAY: "For free"]

"...and gets 15.9% conversion rate."

[TEXT OVERLAY: "Without spending a cent"]

"You're not losing to better marketers."

"You're losing to people who understand GEO."

[TEXT OVERLAY: "Free audit in bio"]

CAPTION: The average SA SME wastes 60% of their digital ad budget.

Not because they're bad at marketing.

Because they're optimizing for the wrong platform.

Your customers aren't scrolling Facebook looking for you.

They're asking ChatGPT.

Link in bio for the free audit.

TUESDAY 18 AUGUST 2026

POST 17 — X (Twitter) | 8:00 AM | ACTIONABLE

The SA SME Ad Spend Autopsy:

Where your R20,000/month actually goes:

→ 60% wasted on broad targeting → 25% lost to attribution gaps → 10% eaten
by ad fatigue → 5% reaches qualified prospects

You're not paying for customers.

You're paying for impressions that never convert.

GEO-referred visitors convert at 15.9%.

No ad spend required.

The playbook is free: happyhunterdigital.com/audit

#GEO #AISearch #SouthAfrica #DigitalMarketing #SME

POST 18 — Instagram | 6:00 PM | ACTIONABLE

[CAROUSEL: 6 slides]

SLIDE 1: "THE R1,000 vs R1,000,000 MARKETING STRATEGY"

SLIDE 2: [Left] R1,000 on GEO optimization - Schema markup - AI-readable
content - llm.txt file - FAQ page

SLIDE 3: [Right] R1,000,000 on Meta ads over 3 years - Impressions: 2.4M -
Clicks: 8,000 - Leads: 40 - Cost per lead: R25,000

SLIDE 4: [Left result] 500 qualified AI-referred visitors - 79 conversions at 15.9%
- Cost per lead: R1.25

SLIDE 5: [Right result] 40 unqualified clicks - 1 conversion at 2.5% - Cost per
lead: R25,000

SLIDE 6: "Stop burning money. Start building AI visibility. Link in bio."

CAPTION: One strategy costs R1,000 and generates 500 qualified leads.

The other costs R1,000,000 and generates 40 unqualified clicks.

This isn't theory. This is what happens when you shift from ad-dependent marketing to AI-optimized visibility.

The businesses winning in 2026 aren't spending more.

They're spending smarter.

#LiveWorkshop

POST 20 — LinkedIn | 12:30 PM | ACTIONABLE

The WhatsApp Automation Blueprint for AI Referrals

Here's a truth most SA businesses miss:

AI referrals convert at 15.9% because visitors arrive PRE-QUALIFIED.

But most businesses lose them within 30 seconds of landing on their website.

Why? Because they make the visitor fill out a form and wait 24 hours for a response.

In 2026, that's a death sentence.

Here's what AI-ready South African businesses are doing instead:

- 1☐ WhatsApp Business API auto-response triggers the SECOND someone clicks from an AI platform
- 2☐ Lead qualification flow: "Hi! Are you looking for [Service A] or [Service B]?"
- 3☐ Instant value delivery: "Great choice. Here's our pricing guide: [link]"
- 4☐ Human handoff trigger: "Type TALK to speak to our team directly"
- 5☐ CRM integration tracks every AI-referred lead from first message to conversion

Result: 22% conversion rate from AI-referred WhatsApp conversations vs 3.2% from website form fills.

The complete WhatsApp automation flow — including message templates, CRM integration guide, and trigger setup — is in our free 2026 AI Marketing Playbook. Link in comments.

#GEO #AISearch #SouthAfrica #DigitalMarketing #SME #WhatsAppAutomation #LeadGeneration

THURSDAY 20 AUGUST 2026

POST 21 — TikTok | 11:00 AM | ACTIONABLE

[VIDEO: Screen recording. Fast tutorial.]

HOOK (0-3s): "This one file makes ChatGPT understand your business."

[Shows creating llm.txt file] "Create a file called llm.txt"

[Types content] "Add: What you do. Who you serve. Where you operate. Your credentials."

[Shows uploading to website root] "Upload it to your website root. Done."

[TEXT OVERLAY: "Takes 10 minutes"] "This tells AI models exactly who you are."

[TEXT OVERLAY: "Free template in bio"] "Full template + 46 more tactics in our Playbook."

CAPTION: The llm.txt file is like a business card for AI.

It tells ChatGPT, Gemini, and Claude exactly: → WHAT you do → WHO you serve → WHERE you operate → WHY you're credible

Most SA businesses don't have one.

Which means AI has no idea they exist.

Full template is in our free Playbook. Link in bio.

#SouthAfrica #BusinessTips #MarketingHacks #GEO #AISearch

#DigitalMarketing #SABusiness #ChatGPT

POST 22 — X (Twitter) | 5:00 PM | PROOF

I replaced a client's R25,000/month Meta ad budget with GEO optimization.

Results after 90 days:

Before: → R25K/month ad spend → 180 clicks → 3 leads → 0 conversions

After: → R0 ad spend → 47 AI referrals → 12 leads → 8 conversions

The difference wasn't budget.

It was visibility architecture.

Free audit: happyhunterdigital.com/audit

#GEO #AISearch #SouthAfrica #DigitalMarketing

FRIDAY 21 AUGUST 2026

POST 23 — Instagram | 8:00 AM | PROOF

[REEL: Before/After screen recordings. Split screen.]

[LEFT SIDE — BEFORE] "3 months ago" [Shows Google Analytics: 12 visitors/day, 0 from AI] [Shows empty ChatGPT search for their brand]

[RIGHT SIDE — AFTER] "Today" [Shows Google Analytics: 89 visitors/day, 34 from AI referrals] [Shows ChatGPT recommending their business]

[TEXT OVERLAY: "Same business. Different strategy."]

CAPTION: This Cape Town-based consultancy was invisible to AI 90 days ago.

Today, ChatGPT recommends them as one of the top 3 in their category.

What changed?

Not their product. Not their pricing. Not their team.

What changed was their digital entity architecture: → FAQ schema on every service page → AI-readable About page with clear entity signals → Updated content every 2 weeks → LocalBusiness schema with areaServed tags → llm.txt file

Total cost: R0 (besides our time)

Total AI referrals in 90 days: 34 Total conversions: 6

Your business could be next.

#MarketingStrategy #CaseStudy

POST 24 — Facebook | 3:00 PM | AWARENESS

The Hidden Cost of AI Invisibility

Most South African business owners don't know this number:

15.9%

That's the conversion rate for AI-referred visitors.

Compare that to: → Organic search: 1.76% → Paid social: 1.5-2% → Display ads: 0.5-1%

AI referrals convert 9x better than organic search because the visitor arrives with implicit trust.

ChatGPT already vetted you. Already compared you. Already decided you were worth recommending.

That visitor is pre-qualified, pre-trusted, and pre-sold.

But here's the problem: If ChatGPT doesn't know your business exists, you never get that 15.9% conversion opportunity.

You're fighting for 1.76% while your AI-optimized competitor is quietly capturing 15.9%.

And you don't even know you're losing.

That's the hidden cost of AI invisibility. It's not just lost traffic. It's lost high-intent, high-trust, high-conversion traffic.

Find out where you stand. 90 seconds. No email.

SATURDAY 22 AUGUST 2026

POST 25 — LinkedIn | 7:30 AM | ACTIONABLE

The Schema Markup Cheat Sheet for South African Businesses

If you do ONE thing this week to improve your AI visibility, do this:

Add these 5 schema types to your website:

1❑ LocalBusiness Schema Critical for SA's multi-language, multi-city market.

Include: name, address, geo-coordinates, telephone, areaServed

(Johannesburg, Cape Town, Durban, etc.)

2❑ FAQPage Schema Increases AI citation probability by 28-34%. Add your top 10 customer questions with clear, factual answers.

3❑ Service Schema For each service you offer, include: → serviceType → areaServed → provider (link to your LocalBusiness schema) → description (AI-readable, not marketing fluff)

4❑ Review Schema AggregateRating from real customers. AI models use trust signals to decide who to recommend.

5❑ BreadcrumbList Schema Helps AI understand your site structure and content hierarchy.

Most SA businesses have ZERO of these.

Adding all five takes about 2 hours if you know what you're doing.

Or you can download our complete Schema Templates + Checklist in the free 2026 AI Marketing Playbook.

Link in comments.

WEEK 3: THE GEO KNOWLEDGE GAP + PROOF

Theme: The Data Doesn't Lie — GEO Works

MONDAY 24 AUGUST 2026

POST 29 — LinkedIn | 7:30 AM | PROOF

Case Study: How a Durban Logistics Company Got 28 AI Referrals in 45 Days
Business: Mid-size logistics, Durban + Johannesburg routes Problem: Spending R35,000/month on Google Ads. Invisible to ChatGPT and Perplexity. Challenge: B2B service — buyers ask AI for “reliable logistics companies in Durban”

What we implemented:

Week 1: → Added LocalBusiness schema with 5 areaServed locations → Created FAQ page with 15 questions about shipping routes, pricing, and timelines → Added Service schema for each logistics service type

Week 2: → Rewrote all service pages with clear entity signals → Added review schema to 12 existing testimonials → Created llm.txt file

Week 3: → Set up WhatsApp Business API with auto-response for AI-referred traffic → Created comparison table: “Road freight vs air freight vs sea freight”

Results after 45 days: → 28 AI-referred visitors (ChatGPT: 14, Gemini: 9, Perplexity: 5) → 4 qualified leads (B2B, R500K+ annual contracts) → 1 signed contract worth R2.1M over 3 years → Google Ads budget reduced by 40%

The ROI on GEO optimization isn’t measured in clicks.

It’s measured in contracts that your competitors never saw coming.

[VIDEO: Screen recording. “AI Audit Reveals” series.]

HOOK (0-3s): “AI Audit Reveals: A Pretoria law firm ChatGPT has never heard of.”

[Screen recording: ChatGPT search] “Best commercial lawyers in Pretoria”

[Shows 3 results. None are the target firm.]

“This firm has been in business for 18 years.”

“They rank #3 on Google for ‘commercial lawyer Pretoria.’”

“But ChatGPT? Never heard of them.”

[Shows their website] “Look at this About page: ‘We are a dynamic team committed to excellence...’”

[TEXT OVERLAY: “AI can’t parse fluff”]

“No FAQ page. No schema. No entity signals.”

“They’re invisible to the platform where their highest-value clients are asking questions.”

[Shows fixed version] “We rewrote their About page in 20 minutes.”

“Added FAQ schema. Added LocalBusiness markup.”

“30 days later: ChatGPT cited them as a top recommendation.”

[TEXT OVERLAY: “Free audit in bio”]

CAPTION: 18 years in business.

#3 on Google.

Invisible to AI.

This is happening to South African businesses right now.

Is yours one of them?

POST 31 — X (Twitter) | 8:00 AM | ACTIONABLE

The AI Visibility Checklist — test your business right now:

☐ Ask ChatGPT: “Best [your industry] in [your city]” — are you there? ☐ Does your About page say WHAT, WHO, WHERE in the first sentence? ☐ Do you have FAQ schema? (Use Google’s free tool) ☐ Is your Google Business Profile updated this month? ☐ Do you have a llm.txt file? ☐ Has your main content been updated in 90 days?

If you checked NO on 3 or more, you’re invisible to AI.

Fix it: happyhunterdigital.com/audit

POST 32 — Instagram | 6:00 PM | ACTIONABLE

[CAROUSEL: 7 slides]

SLIDE 1: "THE 5-MINUTE GEO AUDIT"

SLIDE 2: "STEP 1: The ChatGPT Test" Open ChatGPT. Ask: "What are the best [your industry] businesses in [your city]?" If you're not there, you have a GEO problem.

SLIDE 3: "STEP 2: The About Page Test" Does your About page clearly state: → WHAT you do → WHO you serve → WHERE you operate → WHY you're credible If not, AI can't understand your business.

SLIDE 4: "STEP 3: The Schema Test" Go to Google's Structured Data Markup Helper. Can you add FAQ schema to your homepage? If you don't know how, you need help.

SLIDE 5: "STEP 4: The Freshness Test" When did you last update your website content? If it's been 3+ months, AI considers you stale. Staleness penalty: ~1.8% coverage lost per month.

SLIDE 6: "STEP 5: The Competitor Test" Ask ChatGPT about your top 3 competitors. Are they cited? Are you? If they're there and you're not, they're capturing YOUR leads.

SLIDE 7: "Want the Full 47-Point Audit?" "Our free AI Marketing Audit covers everything — schema, entity signals, content freshness, local optimization, and AI citation probability. Link in bio."

CAPTION: This 5-minute audit will tell you everything you need to know about your AI visibility.

Most SA businesses fail 4 out of 5 tests.

Don't be most businesses.

WEDNESDAY 26 AUGUST 2026

POST 33 — Facebook | 9:00 AM | PROOF

CLIENT WIN WEDNESDAY

Business: Boutique hotel, Cape Town waterfront Problem: Heavy reliance on Booking.com (15% commission on every reservation). Wanted direct bookings.

What we did: → Added Hotel schema with priceRange, amenityFeature, and aggregateRating → Created FAQ page: “Best boutique hotels in Cape Town” with structured data → Added LocalBusiness schema with geo-coordinates → Set up WhatsApp automation for direct booking inquiries → Updated blog content monthly with local area guides

Results after 60 days: → 19 AI-referred visitors (ChatGPT: 8, Gemini: 7, Perplexity: 4) → 7 direct bookings via WhatsApp → R42,000 in revenue that would have cost R6,300 in Booking.com commissions → Commission savings alone paid for the GEO optimization

The owner said: “I thought AI search was for tech companies. Now it’s our second-biggest lead source.”

This is what happens when you stop renting customers from platforms and start owning your AI visibility.

Want the same audit? Link in bio.

POST 34 — LinkedIn | 12:30 PM | AWARENESS

The Staleness Penalty Nobody Talks About

Here’s a number that should terrify you:

1.8%

That’s how much AI citation coverage you lose EVERY MONTH your content stays stale.

Brands updating content monthly see approximately 23% higher AI coverage.

Let me say that again: Updating your content once a month gives you 23% more AI citations than letting it sit.

Why? Because AI models prioritize fresh, authoritative signals.

Google's AI Overviews pull from recently updated sources. ChatGPT's knowledge cutoff means it favors entities with current signals. Perplexity explicitly weights recency in its citations.

Most South African businesses build a website and forget about it.

They treat it like a billboard.

But AI doesn't read billboards. AI reads living, breathing, updated digital entities.

The businesses winning AI referrals in 2026 aren't just optimized once.

They're optimized continuously.

Monthly content updates. Quarterly schema audits. Weekly AI visibility testing.

This isn't a one-time project. It's a competitive advantage that compounds.

Our free audit shows you exactly where you stand today. And our Playbook shows you how to maintain it.

#MarketingStrategy #Results

POST 38 — Facebook | 3:00 PM | ACTIONABLE

The Local SEO vs AI-Ready Comparison

Most South African businesses are optimized for Google Maps.

Almost none are optimized for AI recommendations.

Here's the difference:

LOCAL SEO (Google Maps): → Google Business Profile with photos → NAP consistency (Name, Address, Phone) → Local citations in directories → Customer reviews on Google → Goal: Rank in the "Local Pack" (top 3 map results)

AI-READY (ChatGPT/Gemini/Perplexity): → LocalBusiness schema with geo-coordinates → FAQ schema about local services → AI-readable content with clear entity signals → Fresh, updated content monthly → Third-party mentions (reviews, news, Reddit) → Goal: Get cited as a recommendation

The problem? Local SEO doesn't guarantee AI citations.

You can rank #1 on Google Maps and still be invisible to ChatGPT.

You need BOTH.

Our free audit checks both your Local SEO score AND your AI-Ready score.

Most businesses score 75+ on Local SEO and 15-20 on AI-Ready.

That gap is costing you leads you don't even know you're losing.

SATURDAY 29 AUGUST 2026

POST 39 — LinkedIn | 7:30 AM | AWARENESS

Your Competitor Just Won a Customer You Never Knew Existed

Here's a scenario that plays out thousands of times a day in South Africa:

A business owner in Sandton needs an accountant.

They don't Google "accountant Sandton."

They open ChatGPT and ask: "Who's the best accountant for a R5M turnover business in Johannesburg?"

ChatGPT gives them 3 names.

Your competitor is one of them.

You never even knew this conversation happened.

You never had a chance to pitch.

You never had a chance to compete.

Because you weren't optimizing for the platform where the question was asked.

This is the invisible battlefield.

It's not measured in impressions. It's not measured in clicks. It's measured in recommendations you never knew you lost.

The businesses that figure this out in 2026 will build moats around their customer acquisition that competitors can't cross.

The ones that don't will keep paying R50,000/month for ads while AI gives their competitors free, pre-qualified leads.

Find out if you're in the conversation. Link in comments.

POST 40 — TikTok | 7:00 PM | AWARENESS

[VIDEO: POV format. Dramatic.]

HOOK (0-3s): "POV: You finally check if ChatGPT knows your business"

[Opens ChatGPT] "Best [industry] in [city]"

[Loading...]

[Shows 3 competitors]

[Your business: not there]

[Cut to Google Analytics] "Your ad spend this month: R35,000"

[Cut to empty conversion report] "Your leads: 2"

[Cut back to ChatGPT] "Your competitor's free AI referrals: 28"

[TEXT OVERLAY: "You paid for ads. They got recommended."]

[TEXT OVERLAY: "The game changed."]

[TEXT OVERLAY: "Free audit in bio"]

CAPTION: The worst part isn't that you're losing customers.

The worst part is you don't even know you're losing them.

AI referrals happen in private conversations.

You can't see them. You can't track them. You can't fight for them.

Unless you're optimized for GEO.

Link in bio. 90 seconds. No email.

MONDAY 31 AUGUST 2026

POST 43 — LinkedIn | 7:30 AM | CONVERSION

Last day of August. Let's be honest about where you are.

Did you check your AI visibility this month?

Did you add schema markup?

Did you update your content?

Did you test whether ChatGPT recommends you?

If the answer is NO to any of these, you've spent August losing leads to competitors who said YES.

The good news: September is a new month.

The better news: It takes 90 seconds to see exactly where you stand.

Our free AI Marketing Audit shows you: → Your AI citation probability → Your schema markup score → Your content freshness rating → Your entity signal strength → Your local optimization gaps → Exactly what to fix first

No email required. No sales call. Just data.

Because you can't fix what you can't see.

Start September with clarity. Link in comments.
